# ANCHOR INSPECTOR

**APP-Assistant for  
GROUTED ANCHOR  
TESTS**

**NEW  
Version**

The **Anchor Inspector APP** is designed to assist you with Acceptance and Suitability tests for Grouted Anchors and Nailing as well as with Micropile tensile tests and Lifting controls!

What are the advantages of the **Anchor Inspector APP** for your company?

## Cost and Time savings

### > Digital test templates automatically on your computer

Within a few minutes, templates for the entire Construction site are ready to use and your Employees can focus on the key tasks again!

### > Sending and receiving templates by e-mail

Printing out all templates no longer keeps away your Employees from more productive work!

### > Generate your PDF-reports directly on site within seconds

Your Employees can forward the report immediately by e-mail and may carry on with the next test straight away!

## Quality improvement

### > Test evaluation in real time (creep dimension, free steel length, etc.)

Your Employees can react to any anomalies already during the test. If necessary, they may interrupt the work on time before the anchor gets damaged!

### > Professional presentation

Show your Client and the Site Inspector directly on site that your Employees are on top of technology and they leave nothing to chance!
